

1. State any two indicators of educational achievement in a country? (1)
2. If mode is 63 and median is 77, calculate arithmetic mean. (1)
3. What do you mean by rural development? (1)
4. The average marks in statistics of 10 students of a class were 68. A new student took admission with 72 marks whereas two existing students left the college. If the marks of these students were 40 and 39, find the correct average marks. (3)
5. Find out the median of the following data: (3)

CI	10-20	20-30	30-40	40-50	50-60	60-70	70-80	80-90
f	15	21	35	52	49	17	3	1

6. Calculate the Mode by grouping method. (3)

CI	10-20	20-30	30-40	40-50	50-60	60-70	70-80	80-90
f	4	10	25	15	23	22	12	3

7. Explain the role of micro-credit in meeting credit requirement of the poor. (4)
8. Discuss the following as a source of human capital formation: (2+2)
 - (i) Health infrastructure
 - (ii) Expenditure on migration

-X-X-X-X-X-
